

Utilizing Backups in VISION

Take advantage of fully automated file recovery with VISION's "Create Backups" feature. In the case of PC issues, users' files remain intact ensuring progress is never lost. When enabling this feature VISION will automatically back up every Project (.vpj), Screen (.vsc), Strategy (.vst), Calibration (.cal) and REC (.rec) in real time.

To enable "Create Backups" go to Tools -> Options -> General:

User Field Titles	Log Window	Enhanced Diagnostics	J1939	Paths
Import/Export	Data Analysis	Model Browser	Addins	TCP/IP
General	Reco	ordings Recorder/Stripchart		chart
Auto-reload prompt:				
Never Reload	\sim			
Display File Tabs Dock Project Auto-hide Pro Create Backups Reload Last Ope Append numeric Apply base value Disable scroll wh Wam non-monot Disallow non- Show unsupport Markers affect A Delete confirmat Enable default ss Save as:	iect In Files suffix on Save As fil se when switching c ieel for calibration ch onic axis ed Operating System LL active recorders ion required for Data ave as version	e operations alibrations hanges n warning and stripchart recorders Items		

Note: This option is tuned on by default.

To utilize backup created by VISION, you first must remove the '.bak' extension in your file explorer. First, you may need to enable Windows to show extensions. In Windows 10 file explorer go to View -> Options -> Change folder and search options:

File Home Share	View			
Preview pane	Extra large icons Large icons Small icons	□ Group by ▼	✓ Item check boxes ✓ File name extensions	
Navigation 🛄 Details pane pane 🔻	Tiles Content V	Sort by ▼	Hidden items items	Options -
Panes	Layout	Current view	Show/hide	Change folder and search options

Next, in the 'View' tab, un-check "Hide extensions for known file types': Advanced settings:

In your VISION files directory, you should see some files with the same name but with a '.bak' extension. Remove the '.bak' extension to just leave the VISION file type extension. For example 'MyScreen.vsc. bak' would change to 'MyScreen.vsc.' Then, simply add the newly-changed file to your VISION project.
