

Custom Fields Template Manager

The Custom Fields Template Manager enables creating templates containing different field items for Stripchart Recordings. Custom fields display in the "Custom Fields" sub-tab of the Stripchart Realtime page.

To create a custom template start by selecting "Tools ->Custom Fields Template Manager" from the drop down menu in VISION.

Cu	stom Field	s Template Ma	nager		? 💌
	Default	Name	Description	Last Modified	
+	\checkmark	Fuel Test	Values for fuel testing	Tuesday, November 17, 2015 11:31:	Master Fields List
		Tire Info	Displays tire information and values	Tuesday, November 17, 2015 11:30:

Columns:

- **Default** Sets the default template for the Custom Fields tab. Only one template can be checked.
- Name Template name defined in the template properties.
- **Description** A brief summary of the templates use or fields it contains.
- Last modified Displays the Day, Date and Time the template was last altered.

Buttons:

- **Master Fields List** Opens the 'Master Fields List Editor' for creating fields to add to templates.
- **New Template** Opens the 'New Template Editor' for creating templates containing fields from the 'Master Fields List Editor'.
- Edit Template Opens the 'Edit Template Editor' for the editing the different attributes of the selected template.
- **Delete Template** Deletes the highlighted template from the list. This does not delete the fields it contains from the Master Fields List.
- Import Template(s) Import saved templates. Templates must be saved in .xml format.
- **Export Template(s)** Export templates in .xml format for use in other VISION systems, Projects or for archival.

Templates are associated to the Stripchart Recorder via the Stripchart Properties window under the General tab.

• **Custom Fields Template Setting** - Drop-down menu containing templates of user defined fields containing macros and information in the 'Custom Fields' sub-tab of the Realtime Tab of the Stripchart Recorder.
