

## Enabling Remote Desktop on a Windows 10 PC

When working from home, you may find it necessary to access your local drives on your PC. Remote desktop provides secure access to your Windows 10 PC from anywhere using a Wi-Fi connection. In order to access your PC, you must first enable remote desktop access.

## Enabling Remote Desktop

1. To enable Remote Desktop begin by opening the Settings from the Windows start menu.

2. From the Settings menu, open the System tab.

## Tech Tip

3. From the Systems menu, select Remote Desktop and switch "Enable Remote Desktop" to on.

Note: Be sure to make note of the PC name as it will be necessary when trying to connect to your PC.
